ADVANCED RAPID PROTOTYPING TECHNOLOGY

SkyWriter3D Desktop Mini is a three dimensional printer or rapid prototyping system which turns blueprints into real 3d objects with absolute precision. The SkyWriter3D Desktop Mini is simple, easy to operate and comes out of the box 95% pre-assembled. Using the illustrated, easy to follow user manual-- you will be creating within minutes. Utilizing the included computer software, PC and MAC, you can control and create anything from the thousands of available on line printable items. Just load your chosen material, ABS, PLA, RUBBER or WOOD FILAMENT. The SkyWriter3D Desktop Printer is based on open-source technology, and with our upgraded, top of the line components and advanced circuit board including the exclusive designed heating platform and other advanced features, make the SkyWriter3D the best small format Desktop 3D Printer on the market today. It is high-precision, high efficiency, with exceptional quality. The SkyWriter3D Desktop Mini is the best choice for small and medium professional quality models. The SkyWriter3D Desktop Mini is the perfect tool for education and the hobbyist, but built for professional use.

SKY3 WRITER D

Hand-Held 3D Printer

A filament is fed into the SkyWriter3D with an auto-material feed motor. At the front of the Hand held printer the material is melted and extrudes out the ceramic tip, hardening in seconds allowing you to create items and literally draw in mid air.

The power to create anything in the palm of your hand

SkyWriter3D hand-held 3D printer can use PLA, ABS and WOOD filament
